

Quality Policy

Our goal is to provide world class driver training, in accordance with nationally agreed best practice to all levels of driver trainee.

We are committed to compliance with ISO:9001 and to continually reviewing our management system to improve each operation, transaction and interaction within our organisation between internal and external customers.

Specific quality objectives are set to monitor and manage business performance.

Our determination to get each step right, first time, every time and improve our standards and procedures is reflected in greater quality at all levels of our business.

We recognise that people are our strength and we continually work to develop all staff to provide them with the best opportunities to accomplish our common goals.
